

Torroids Choke Coils

Features

- The TR series coil are made from iron powder to provide High performance, compact size and low cost.
- These products have high saturation magnetic-flux density And excellent DC superposition characteristics.
- These products have low leakage and acoustic noise is minimal.

Applications

- Choke coil for smoothing circuit of the switching power supply.
- Choke coil for active filter.
- Power lines filter for EMC application.

Part Number Systems

TR - 1809 - 1R0 - M - V-LF
